

IT'S ONE WELL-ROUNDED FRYER LINE.

INTRODUCING THE MASTER JET PRO SERIES FROM FRYMASTER.

The Master Jet Pro Series combines innovative form with dependable function to provide the most attractive high-performance frying solution.

Sleek rounded styling enhances aesthetics and allows easier cleaning.

New stainless steel alloy construction extends long frypot life even longer.

Larger 3-inch drain line creates 13% more capacity for oil to drain freely.

Footprint Pro filtration system collects oil drips in the pan instead of on the floor.

Cabinet has been redesigned to accommodate the Footprint Pro filtration system*
*With the exception of the MJCF fryer.

Frymaster offers Energy Star compliant fryers both in gas and electric models.
