NOTICE

IF, DURING THE WARRANTY PERIOD, THE CUSTOMER USES A PART FOR THIS ENODIS EQUIPMENT OTHER THAN AN UNMODIFIED NEW OR RECYCLED PART PURCHASED DIRECTLY FROM FRYMASTER DEAN, OR ANY OF ITS AUTHORIZED SERVICE CENTERS, AND/OR THE PART BEING USED IS MODIFIED FROM ITS ORIGINAL CONFIGURATION, THIS WARRANTY WILL BE VOID. FURTHER, FRYMASTER DEAN AND ITS AFFILIATES WILL NOT BE LIABLE FOR ANY CLAIMS, DAMAGES OR EXPENSES INCURRED BY THE CUSTOMER WHICH ARISE DIRECTLY OR INDIRECTLY, IN WHOLE OR IN PART, DUE TO THE INSTALLATION OF ANY MODIFIED PART AND/OR PART RECEIVED FROM AN UNAUTHORIZED SERVICE CENTER.

⚠ DANGER

Copper wire suitable for at least 167°F (75°C) must be used for power connections.

⚠ DANGER

The electrical power supply for this appliance must be the same as indicated on the rating and serial number plate located on the inside of the fryer door.

⚠ DANGER

This appliance must be connected to the voltage and phase as specified on the rating and serial number plate located on the inside of the fryer door.

⚠ DANGER

All wiring connections for this appliance must be made in accordance with the wiring diagrams furnished with the equipment. Wiring diagrams are located on the inside of the fryer door.

⚠ DANGER

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

⚠ WARNING

Do not attach accessories to this fryer unless fryer is secured from tipping. Personal injury may result.

⚠ WARNING

Frymaster fryers equipped with legs are for permanent installations. Fryers fitted with legs must be lifted during movement to avoid damage and possible bodily injury. For a moveable or portable installation, Frymaster optional equipment casters must be used.

Overview

The model number of a Dean or Frymaster fryer reveals a lot: number and size of vats, presence of filtration. The complete model number, although not always provided, reveals the type of controller, the presence of splits, and the finish of the cabinet.

This parts manual provides the essential components for a host of fryers. Some have similar model numbers, such as the D50 and the H50, while the fryer designs are quite different. For example, an FPPH350 is a footprint-filter equipped H50 fryer with three frypots. A FPD450 is a filter-equipped Dean Decathlon fryer with four frypots.

Consult this matrix to determine type of fryer in question.

H50/55

The H50/55 series fryer is Frymaster's flagship gas fryer.

Unique physical characteristic:

- Closed burner with blowers to enhance efficiency of combustion.

Where Used:

- McDonald's, Burger King, and other large fast-food restaurants.

Common Model Numbers

- FPPH355

Burners are attached to either side of the frypot. See arrow.

Open Burner

The open burner, or Master Jet, family of fryers includes the 35, 45, CF, and J1C series at the upper end and the GF14 and GF40 at the lower end.

Unique physical characteristic:

- A U-shaped burner manifold surrounds the frypot, supplying flame to metal deflectors, or targets, which direct the heat to the frypot.

An open burner surrounds the frypot of the MJ series of fryers. Orifices secure the deflectors.

Where used:

- Burger King uses 45's. The other models will be found in smaller restaurants.

Common Model Numbers: FPP235, FMP245, PMJ145, MJ1CF, KJ3FC, J1C,

NOTE: A gas valve capacitor (P/N 806-4781) is required on gas valves used on units with Thermostat Controllers.

Decathlon

The Decathlons are large tube fryers often used for bone-in chicken. Flame passes through tubes in the frypot, which transfer heat to the oil. Decathlon is indicated in the model name with a D: D50's, D60's and D65's are all models of the Decathlon family.

Unique physical characteristics:

- Burner tubes rest on a gas manifold at the front of the fryer, transferring heat to tubes in the frypot.

Where used:

- The Decathlon is common in Chili's.

Common Model numbers:

- SCFHD250, SCFHD350, SCFHD460, HD160

24G

The 24G is a large flatbottom fryer with draft induction system, which draws heated air across the bottom of the fryer. Baffles welded to the pot impede the flow of the air and increase temperature transfer.

Unique physical characteristic:

- Rear draft system

Where used:

- KFC, LJS, Captain D's and other fish chains

Common Model Numbers:

- 1824G, 2424G, KSCF42424G

Heated air is drawn across the bottom of the 24G frypot with a blower-driven draft system.

Dean Millivolt

The SR and SM-series of Dean fryers are millivolt-powered units.

Unique Physical Characteristics:

- A no-frills millivolt fryer.

Where used:

- IHOP uses SM fryers with filtration, small restaurants, bars, catering vehicles use the SR series.

Common Model Numbers:

SR42, SR52, SR62, SM250, SM150, SCFSM250

Pro Electric/RE

RE

Pro Electric

The Pro Electric fryer, which introduced a new filter pan and a large drain manifold among other design changes, was followed by the RE, which introduced a unique rotating element. The units share many common electrical components.

Unique physical characteristics:

Pro Electric — 3-inch drain manifold, filter pan redesign

RE — Recessed rotating element mounting mechanism, repositioned and redesigned contactor boxes

Where used:

All major chains

Common Model numbers:

- **Pro Electric** — FPPH214, FPPH217, FMPH214; **McDonald's**: BIPH214, BIPH314
- **RE** — FPRE317, FPRE 217, FPRE214; **McDonald's**: BIRE314, BIRE414, BIRE214

The RE fryer has a recessed tubular mounting point for the elements which rotates. This is the most obvious difference between the RE and the Pro Electric.

2836

The 2836 is a large electric fryer used principally in Wal-Mart kitchens to prepare chicken in large quantities. The original design used a round-bar element and had float switches; later units have flat-bar elements and no float switch.

Unique Physical Characteristics:

- The unit is big. Wal-Mart cooks 100 pieces of chicken at a time in the 36Kw frypot. The amp draw demands special wiring for the store. The unit is also sold in a two 28Kw frypot configuration.

The earlier 2836 units have round heating elements and a float switch, which is visible in the left corner above.

Where Used:

- Wal-Mart, however, it is not marketed exclusively to Wal-Mart.

Common Model Numbers:

- FP128/236, FP228

Pumps/Motors

Frymaster fryers use Viking pumps; Dean units have Haight pumps. The 4 GPM pump used in Frymaster fryers will fit in most units. The same can be said for Dean pumps, although 4GPM, 5GPM, and an 8 GPM pump are available.

What to Watch For:

- Pumps are easily clogged. Don't replace a pump/motor assembly without cleaning the pump.

How to Order:

- Frymaster doesn't sell pump/motor assemblies, essentially to deter needless replacement of both components. Pumps and motors are listed separately, each with a gasket.

It doesn't take much debris to clog a pump. The one above was believed failed and replaced. All it needed was cleaning. Warranty claims for functioning pumps are rejected.

UHC-P

The UHC-P is the second generation of the holding cabinet, which, until recently, was made exclusively for McDonald's. This cabinet is programmed with a Palm Pilot.

Unique Physical Characteristics:

- Dark IR port on top right of the cabinet. Programming is beamed to the cabinet through this port from a Palm Pilot. The unit is offered in four-slot (shown above), two-slot and narrow configurations. There is no parts interchangeability between the UHC-P and the earlier UCH.

Where Used:

- McDonald's. A generic version called the Holdmaster is just being brought to market. The bezels and heater plates are different on the generic model.

Common Model Numbers: UHC-P4, UHC-P2 and UHC-P Narrow
