Loading UHC-HD Software Upgrade

1. With the cabinet running, place flash drive in USB port.
2. Press master program button.
3. Enter code 98765.
4. Press OK..
5. Press right arrow key to scroll to *BOOTLOAD MAIN BOARD.*
6. Press OK to Accept.
7. Master Display: *COPYING FILE PLEASE WAIT.*
8. Master Display: Complete.
9. Press OK. No further action is required to update the software.
10. Master Display: *MAIN BOOTLOADING*, changing to percent complete . (Other displays may occur, depending on the version levels of the cabinet's circuit boards.)
11. Master Display: *R1...* changing to rising numbers which changes to *BOOTLOAD MAIN*, changing to *BRFST* when complete.
12. Press the master program button and enter 090809. Use the arrow keys to scroll to main board version number to ensure it is at 1.52.
13. Press OK.
14. 14. Return the cabinet to its previous menu and reset timer buttons.

NOTE: Software update takes 5 to 15 minutes, depending on the existing version level of the cabinet's circuit boards.
DO NOT TURN THE CABINET OFF DURING THE UPGRADE.
