Bulletin 2004-41-ABDE

Page 1 of 1

Date: 12/17/2004

SUBJECT: UHC-P Displays

There have been some failures of the display used in the UHC-P. The cabinets fail to stop beeping during startup. The problem has been traced to contaminated flux used during the assembly of some of the displays.

Please pull your existing stock of service displays for UHC-Ps (part number 807-3707, \$240 list). These displays should only be installed if a UHC-P cabinet is down.

Place a stocking order for new displays, returning the original stock to Frymaster when the new displays are delivered.
