## SUBJECT: Replacement Spark Module

Frymaster is shipping a temporary replacement spark module, 807-1312, for the spark module 807-3563. These modules are used on Dean tube fryers with electronic ignition. The modules are the same electrically and all terminals are labeled the same.

When installing the replacement module, the wires are swapped one for one. The replacement is physically larger, however, and has a different mounting pattern. Below are instructions for installing the replacement module.

*The enclosed module is a replacement for the 807-3563. Mounting the new module will require the addition of a 1/4-inch female push-on terminal on the existing ground wire, replacing the eyelet.*

*The footprint of the new module is larger and longer screws will be required to mount the new module.*

*If you have questions, contact Frymaster's Service Hotline: 1-800-551-8633.*

807-3563 (above).

807-1312 (above) can be used as 807-3563 and is being shipped as a direct replacement.
