Bulletin 2014-04-ABDE

Page 1 of 2

Date: 10/7/2014

SUBJECT: Release of FilterQuick Fryer

FilterQuick electric (left) and gas.

The Frymaster FilterQuick Fryer, in electric and gas, is released for sale in all markets.

The FilterQuick fryers feature prompted semi-automatic filtering, automatic oil top off and a FilterQuick Smart4U controller, which has 20-product buttons

The new fryers have low-volume fry pots and there are many similarities to Frymaster's other automated fryers.

The oil top-off system is like the LOV fryer and tops off through the return manifold. There is a reset switch on the fryer, which eases rebooting of the computer system.

Two hours are allowed, per system, for the start-up. Two hours are allowed for training the store personnel. See the start-up and training forms, 819-7129 and 819-7130.

FAS techs familiar with the LOV fryer should be comfortable with the FilterQuick fryer.

The probes, burners and elements used on FilterQuick fryers are the same as the LOV stocking parts. The ATO, MIB and AIF boards used on the FilterQuick fryers are similar to LOV boards but carry different software and part numbers. They are not interchangeable.

Service agencies will be notified as the new fryers are shipped to their areas. Required stocking parts are provided on the following page.

Parts, Literature Lists on Back

Required Parts	
Number	Description
826-3054	Solaronics nat ignitor std
108-0639	Shurflo tophoff pump*
810-3007	Magnet
108-5777	Controller, filter quick gas
108-5731	Push/pull rod assy
108-5717	ATO board
108-5721	AIF board
