

Service Bulletin

Subject: LOV Cap-N-Splash Fryers

APRIL 26, 2017

The new Cap-N-Splash frame is all that is needed to convert LOV fryers built after mid-March 2017 for use under a Cap-N-Splash hood.

Frymaster's LOV fryers manufactured after mid-March 2017 no longer require a service kit to be fitted to a Cap-N-Splash hood. Fryers built after that are all designed for Universal hood placement with the Cap-N-Splash frame the only part necessary to fit the fryer to a Cap-N-Splash hood.

Vat Count	Gas LOV	Elec LOV
2	8239148	8239151
3	8239149	8239152
4	8239150	8239153

The fryers have basket hangers attached to the flu cap. The Cap-N-Splash locking frame simply slips onto the flue cap and the outer edges of the fryer.

The new Cap-N-Splash frame can also be used to convert pre-March 2017 Universal Hood style LOV fryers for use in Cap-N-Splash hoods.

The new Cap-N-Splash frame cannot be used on older non-LOV fryers. The earlier Cap-N-Splash kits remain available.
