

Service Bulletin

Subject: Online Training Sign On Errors

3/20/2020

What: Sign-On Errors Using Classroom Code

Attempts to sign on to Frymaster's online training with the code provided are producing messages saying the code is inaccurate.

This appears to be a problem seen across the Google Classroom platform.

Remedy: New Codes, New Sign On Approach

The classroom codes have been changed:

Frymaster Classroom 1: r25zaud

Frymaster Classroom 2: 5jhq7s4

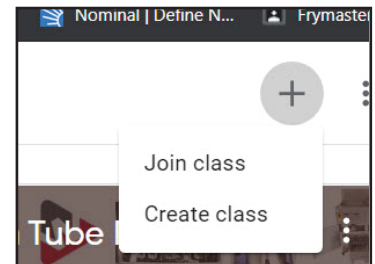

The content of each classroom is the same.

New Sign In: Try This

- In Google Chrome, sign out of all open windows.
- Open an incognito window and go to classroom.google.com
- Click the go to classroom button.
- It will require your Google email and password.
- Click the + (right) to pull down the Join Class window.
- Click and enter the new code (above).

Alternate Approach: Fill out form

Download to your desktop and fill out with your computer the attached form to provide the email addresses of techs seeking entry into the classroom. They must be individual addresses. Press the Email button. (The form must be downloaded to function.)

Click the + on the top right of the classroom.google page to get to the Join Class pulldown.
