

Service Bulletin

Subject: Worldwide Release of McDonald's UHCTHD Holding Cabinets

Models: UHCTHD6/UHCTHD3

6/3/2020

Frymaster is rolling out a new holding cabinet, the UHCTHD holding cabinet with a the easyTouch™ Touch Screen for McDonald's worldwide.

The redesigned Universal Holding Cabinet, used exclusively by McDonald's, is released for sale worldwide. The new unit, the UHCTHD, has been on test in selected sites in the U.S. and internationally.

Although similar in appearance, the new cabinet differs from the existing UHCHD. It features an easy to use and program easyTouch™ Touch Screen. It has eliminated the individual bezel timers.

The cabinet is similar electrically to the UHCHD, but there are few interchangeable components. The parts necessary to support the new cabinet are listed below. The heater plates, while similar, have longer leads.

FAS's servicing McDonald's should order these parts. Additional parts will be added to the required stocking list if the need arises.

Frymaster is currently conducting online technical training sessions on the revised UHCTHD holding cabinets for our FAS network.

| PART # | DESCRIPTION | QTY |
|---------|---------------------------------------|-----|
| 8074882 | BREAKER, 16A | 1 |
| 8076336 | POWER SUPPLY, 12VDC | 1 |
| 8073490 | RELAY, POWER HEAVY DUTY 220V | 1 |
