

# Service Bulletin

**Subject: Training in 2021**

**1/5/2021**

Due to the corona virus pandemic, Frymaster's 2021 training offerings will be online.

The current lineup — webinars, posted recorded webinars, training videos and training modules with testing — will be expanded as the year progresses.

There are currently 15 Frymaster training modules, six webinars, 10 technical videos and dozens of how-to operational videos that can be used for in-store training.

New equipment and any arising issue will get online attention. A training module was recently added for the FilterQuick 120 fryer, a large unit intended for bone-in chicken restaurants.

Participation is largely unlimited. The only requirement is a Google account for the online classroom. FAS's can request hosted webinars to occupy time normally set aside for their in-house training. **Watch for a survey to be emailed soon and please get in touch with online training suggestions.**

Techs successfully completing a training module and its related quiz in our online classroom get a certificate and their participation is recorded. Virtually all the two-day curriculum is included in the online classroom. A list of the current offerings is at above at right.

Frymaster's training webinars (top) are hosted on YouTube. The training modules (above) and tests are on Google Classroom.

**Webinars**

- Gas Ignition Troubleshooting
- Probe Troubleshooting
- Into to Auto Filtering Fryers I
- Into to Auto Filtering Fryers II
- Filtration Issues
- UHCHD-T overview

**Training Modules with Test**

- H55 Series
- Electric Fryers
- Controllers
- Built-in Filtration
- Filter Pump/Motor Replacement
- Auto Filtering Fryers
- Oil Conserving Fryers (OCF)
- FilterQuick Platform2
- FilterQuick 120

- UHCHD-T
- Master Jet
- Millivolt Fryers
- UHCHD
- Dean Fryers
- Water Bath/Pasta Cookers

**Tech Videos**

- Contactor Replacement
- ATO/AIF Board Replacement
- VIB Replacement
- Oil Diverter Installation
- Inline Filter Installation
- SIB Voltage Checks
- Spark Module Replacement
- MIB Replacement
- Spark Module Troubleshooting
- Blower Motor Cleaning
